

Listing of the Claims:

The following is a complete listing of all the claims in the application, with an indication of the status of each:

- 1 1 (Currently Amended). A portal site data providing device for reading an ID
2 from a portable terminal, receiving a user-input portal specifying information
3 and storing in a reversibly removable memory medium of the portable
4 terminal a portal site address for the portable terminal to subsequently access a
5 portal site built according to the user-input portal specifying information,
6 comprising:
7 a data reading/writing device for reading/writing data from/to the
8 reversibly removable memory medium, arranged for mounting the memory
9 medium which is reversibly removable from the portable terminal, and
10 arranged to read the ID ~~from of~~ the portable terminal from the reversibly
11 removable memory medium;
12 a portal specifying information receiving device for receiving a
13 user-input portal specifying information specifying user selection from among
14 a plurality of portal site content options; and
15 an address data storage communication device for transmitting the
16 user-input portal specifying information to an external portal address data
17 storage apparatus and for receiving, from the address data storage apparatus a
18 corresponding user-specific portal site address data indicating an address for
19 the portable terminal to subsequently access the portal site specified by the
20 user-input portal specifying information,
21 wherein the data reading/writing device is arranged to store the
22 corresponding user-specific portal site address data appended to the ID read
23 from the portable terminal in the reversibly removable memory medium of the
24 portable terminal.

1 2. (Previously Presented) The portal site data providing device of claim 1,
2 further comprising:

3 a display device for displaying portal contents information showing the
4 contents of various portal sites, the display device being arranged to read the
5 portal contents information from a portal contents information storage
6 apparatus in which the portal contents information is stored in advance.

1 3. (Previously Presented) The portal site data providing device of claim 1,
2 wherein the portable terminal is a GSM-type portable telephone, and the
3 memory medium of the portable terminal is a SIM card.

1 4. (Previously Presented) The portal site data providing device of claim 2,
2 wherein the portal contents information stored in the portal contents
3 information storage apparatus is information regarding various websites which
4 can be accessed in advance through the portal site.

1 5. (Currently Amended) A portal site data providing device for reading an ID
2 from a memory medium of a portable terminal, receiving a user-input portal
3 specifying information and storing in ~~a~~ the memory medium of the portable
4 terminal a portal site address for the portable terminal to subsequently access a
5 portal site built according to the user-input portal specifying information,
6 comprising:

7 a data reading/writing device for reading/writing data from/to the
8 memory medium of the portable terminal, the data reading/writing device
9 arranged to read the ID from the portable terminal;

10 a portal specifying information receiving device for receiving a
11 user-input portal specifying information specifying user selection from among
12 a plurality of portal site content options; and

13 an address data storage communication device for transmitting the
14 user-input portal specifying information to an external portal address data

15 storage apparatus and for receiving, from the address data storage apparatus a
16 corresponding user-specific portal site address data indicating an address for
17 the portable terminal to subsequently access the portal site specified by the
18 user-input portal specifying information,
19 wherein the data reading/writing device is arranged to store the
20 corresponding user-specific portal site address data appended to the ID read
21 from the portable terminal in the memory medium of the portable terminal.

1 6. (Previously Presented) The portal site data providing device of claim 5,
2 further comprising:
3 a display device for displaying portal contents information showing the
4 contents of various portal sites, the display device being arranged to read the
5 portal contents information from a portal contents information storage
6 apparatus in which the portal contents information is stored in advance.

1 7. (Previously Presented) The portal site data providing device of claim 6,
2 wherein the portal contents information stored in the portal contents
3 information storage apparatus is information regarding various websites which
4 can be accessed in advance through the portal site.

1 8. (Previously Presented) The portal site data providing device of claim 7,
2 wherein:
3 the portal specifying information receiving device is arranged to
4 receive website specifying information for selecting and specifying a website
5 displayed on the display device; and
6 the portal site data providing device comprises:
7 a portal screen data building device arranged for building a portal
8 screen data which shows display data related to an address data accessible to
9 the website selected and specified according to the website specifying
10 information, and

11 wherein the address data storage device comprises a portal screen data
12 storage device for storing the portal screen data built by the portal screen data
13 building device in the memory medium of the portable terminal through the
14 data reading/writing device.

1 9. (Previously Presented) The portal site data providing device of claim 7,
2 wherein:

3 the portal specifying information receiving device is arranged to
4 receive website specifying information for selecting and specifying a website
5 displayed on the display device;

6 the portal site data providing device comprises a portal information
7 transmitting device for transmitting the website specifying information as the
8 portal information to a portal managing server which manages portal
9 information of the user present on a network; and

10 the address data stored in the memory medium of the portable terminal
11 by the address data storage device is an address data accessible to a portal site
12 built by the portal managing server according to the portal information
13 transmitted to the portal managing server.

1 10. (Currently Amended) The portal site data providing device of claim 9,
2 wherein the portal information transmitting device is arranged to transmit an
3 identification data peculiar specific to a user, which is inputted through the
4 portal specifying information receiving device, to the portal managing server
5 by including it in the website specifying information.

1 11. (Currently Amended) The portal site data providing device of claim 9,
2 further comprising an identification data reading-out device for reading out
3 identification data peculiar specific to a user being stored in advance in a
4 memory medium from the memory medium of the portable terminal through
5 the data reading/writing device, wherein

6 the portal information transmitting device is arranged to transmit the
7 identification data read out by the identification data reading-out device to the
8 portal managing server by including it to the website specifying information.

1 12. (Currently Amended) The portal site data providing device of claim 5,
2 wherein the portable terminal is a GSM-type portable telephone, and the
3 memory medium of the portable terminal is a removable SIM card, and
4 wherein the portal site data providing device includes a card reader/writer for
5 receiving the removable SIM card and reading data from and writing data to
6 the removable SIM card.

1 13. (Previously Presented) A method for supplying portal site data to a
2 portable terminal, the method comprising:
3 providing a portable terminal having a pre-stored unique ID and
4 having a reversibly removable memory medium;
5 providing a portal site managing system having a data reading/writing
6 device for reading from and writing to the reversibly removable memory
7 medium;
8 reading the ID from the portable terminal and transmitting the read ID
9 to the portal site managing system;
10 receiving a user-input portal site content specifying information
11 indicating a user selection from among a plurality of portal site content
12 options;
13 generating, in the portal site managing system a user-specified portal
14 site building information based, in part, on the user-input portal site content
15 specifying information;
16 storing in the portal site managing system the user-specified portal site
17 building information, the storing being retrievable based on a portal site
18 address data having the received ID;
19 storing, in the memory medium of the portable terminal the portal site

20 address data having the received ID, further comprising
21 removing the memory medium from the portable terminal and
22 mounting it to the data reading/writing device at least before the storing, in the
23 memory medium of the portable terminal, the portal site address data having
24 the received ID.

1 14. (Previously Presented) A method for supplying portal site data to a
2 portable terminal, the method comprising:
3 providing a portable terminal having a pre-stored unique ID and
4 having a memory medium;
5 providing a portal site managing system having a data reading/writing
6 device for reading from and writing to the memory medium;
7 reading the ID from the portable terminal and transmitting the read ID
8 to the portal site managing system;
9 receiving a user-input portal site content specifying information
10 indicating a user selection from among a plurality of portal site content
11 options;
12 building, in the portal site managing system a user-specified portal site
13 based, in part, on the user-input portal site content specifying information;
14 storing in the portal site managing system the user-specified portal site,
15 the storing being retrievable based on a portal site address data having the
16 received ID; and
17 at least before the storing in the memory medium of the portable
18 terminal of the portal site address data having the received ID, a portable
19 terminal mounting step for mounting the portable terminal to the data
20 reading/writing device so that the data reading/writing device becomes
21 accessible to the memory medium.

15-19. (Canceled)

1 20. (Previously Presented) A computer program product comprising computer
2 executable instructions stored on a computer-readable storage medium which,
3 when executed by a the computer,
4 configure the computer to control a portal site data providing device to
5 read an ID from a portable terminal;
6 configure the computer to control a display of the portal site data
7 providing device to display portal site content options based, at least in part,
8 on the ID read from the portable terminal;
9 configure the computer to receive a user-input portal site content
10 specifying information indicating a user selection from among the displayed
11 portal site content options;
12 configure the computer to build a user-specified portal site based, in
13 part, on the user-input portal site content specifying information, including
14 configuring the computer to control a portal site building data storage device
15 for storing information for forming the portal site to be supplied to the
16 portable terminal and configuring the computer to control a portal information
17 storage device for storing portal information which selects and specifies a
18 website inputted by a user to the portal site data providing device by receiving
19 it from the portal site data providing device;
20 configure the computer to store the built user-specified portal site, the
21 storing being retrievable based on a portal site address data;
22 configure the computer to control the portal site data providing device
23 to write the portal site address appended with the ID into a memory of the
24 portable terminal; and
25 configure the computer to control a portal site information distribution
26 device for transmitting the information for displaying the built portal site to
27 the portable terminal.

21. (Canceled)

1 22. (New) The method for supplying portal site data to a portable terminal of
2 claim 14, wherein the memory medium is reversibly removable from the
3 portable terminal and contains the pre-stored unique ID and the step of step for
4 mounting the portable terminal to the data reading/writing device comprises
5 the step of removing the memory medium from the portable terminal and
6 mounting the memory medium to the data reading/writing device at least
7 before the storing, in the memory medium of the portable terminal, the portal
8 site address data having the received ID.
